CalTech is a fast growing consulting, network administration, and helpdesk service provider with a primary client base of Financial Institutions. Our main strengths are our employees, fun work environment, and most importantly the relationships that we develop with our customers. We serve as a full IT department for some and a compliment (high level or low level) to other IT departments depending on what our clients need. We promote a “work hard play hard” environment with an extreme focus on customer service. CalTech’s pay and benefits package rivals those of a large company, but you get the flexibility and work environment of a small company. Our need for IT talent is greater than ever before.

Benefits include:

- Matching retirement plan
- Family health club membership
- Paid vacation
- Paid holidays
- Health, dental, & life insurance
- Training and certifications
